

ECOPEAK TECHNOLOGY

Giant[®]

Enhancing everyday living

Water Heater with **ECOPEAK**[®] Technology

60-GALLON CAPACITY

TOP ELEMENT
3,800 W

MIDDLE ELEMENT
3,000 W

BOTTOM ELEMENT
800 W

When it comes
to heating water
in an environmentally
responsible way

ECOPEAK[®]

IS YOUR
SOLUTION!

BENEFITS

- Reduces overall demand for electricity during peak periods.
- Extended service life for heating elements and thermostats.
- Cold water inlet at the bottom of the tank – provides over 10% more hot water than models with inlet at the top.
- No difference in electricity costs for water heating.
- **GREENFOAM**[™], environmentally friendly insulation unique to Giant.

SPECIFICATIONS

A three-element water heater provides the same hot water as a traditional two-element water heater of the same capacity, but is less power hungry.

The new efficient model has three less powerful elements that heat water more constantly. The water heater's power demand is thus spread out more uniformly throughout the day, making it the environmentally responsible choice.

Characteristics	 Standard Model	 Cascade	 Super Cascade
	172TPS	172BPS	172EPS
Capacity – gal. (l)	60 (273)		
Low-density elements	3		
Top element (Watts)	3,800		
Middle element (Watts)	3,000		
Bottom element (Watts)	800		
Number of thermostats	3		
Maximum Amperage (Amp)	15.8		
Diameter – inches (cm)	23.5 (60)		
Height – inches (cm)	60.0 (152)		
Weight – lb (kg)	185.0 (84)		
Water inlet	Top	Bottom	Bottom
Drain valve	Plastic	Plastic	Brass
Glass lining	Simple	Simple	Double
 environmentally friendly insulation	Yes	Yes	Yes
Magnesium anode	Normal	Normal	Oversized
Warranty on parts*	1 Year	5 Years	5 Years
Warranty against leaks	6 Years	8 Years	10 Years

Ideal for a family of 2 to 3 people, even 4 to 5 people that are conscientious about their water and energy consumption.

* Some exceptions may apply. See the warranty sheet for complete details.
