9,000 Watt Elements

100 Imp. Gal./454 Litres  
12,000 Watt Elements

These guidelines do not take into consideration teenagers, whirlpools, spas, extra large bathtubs, and multi-head shower systems. Anticipate the future needs of your family when selecting your water heater.

**NOTE :** These figures are based on the latest customer satisfaction statistics of your local utility, taking into account cold water conditions in the winter. These recommendations may be higher than those of other manufacturers. US figures will be less.
